- Unintended use of the air purifier or damage to the housing may result in the escape of dangerous UV-C radiation which is dangerous to the eyes and skin.
- Never operate the UV-C light when it is outside the air purifier.

OPERATIONS

Use the micro USB Cable connect a 5V power adapter or a 5V car charger and connect the other side to the air purifier

- **Auto Mode:**

Once the power is connected, the unit will be set to auto mode then the LED light blinks blue, green, and red cyclically.

After 5 seconds, the LED light emits blue, and the air quality sensor starts detecting. Wait for 2 minutes, the indicator light will indicate the current indoor air quality according to three level:BLUE(good), Green(fair), RED(poor). And automatically adjust the fan speed according to the air quality and works to remove harmful airborne contaminants.

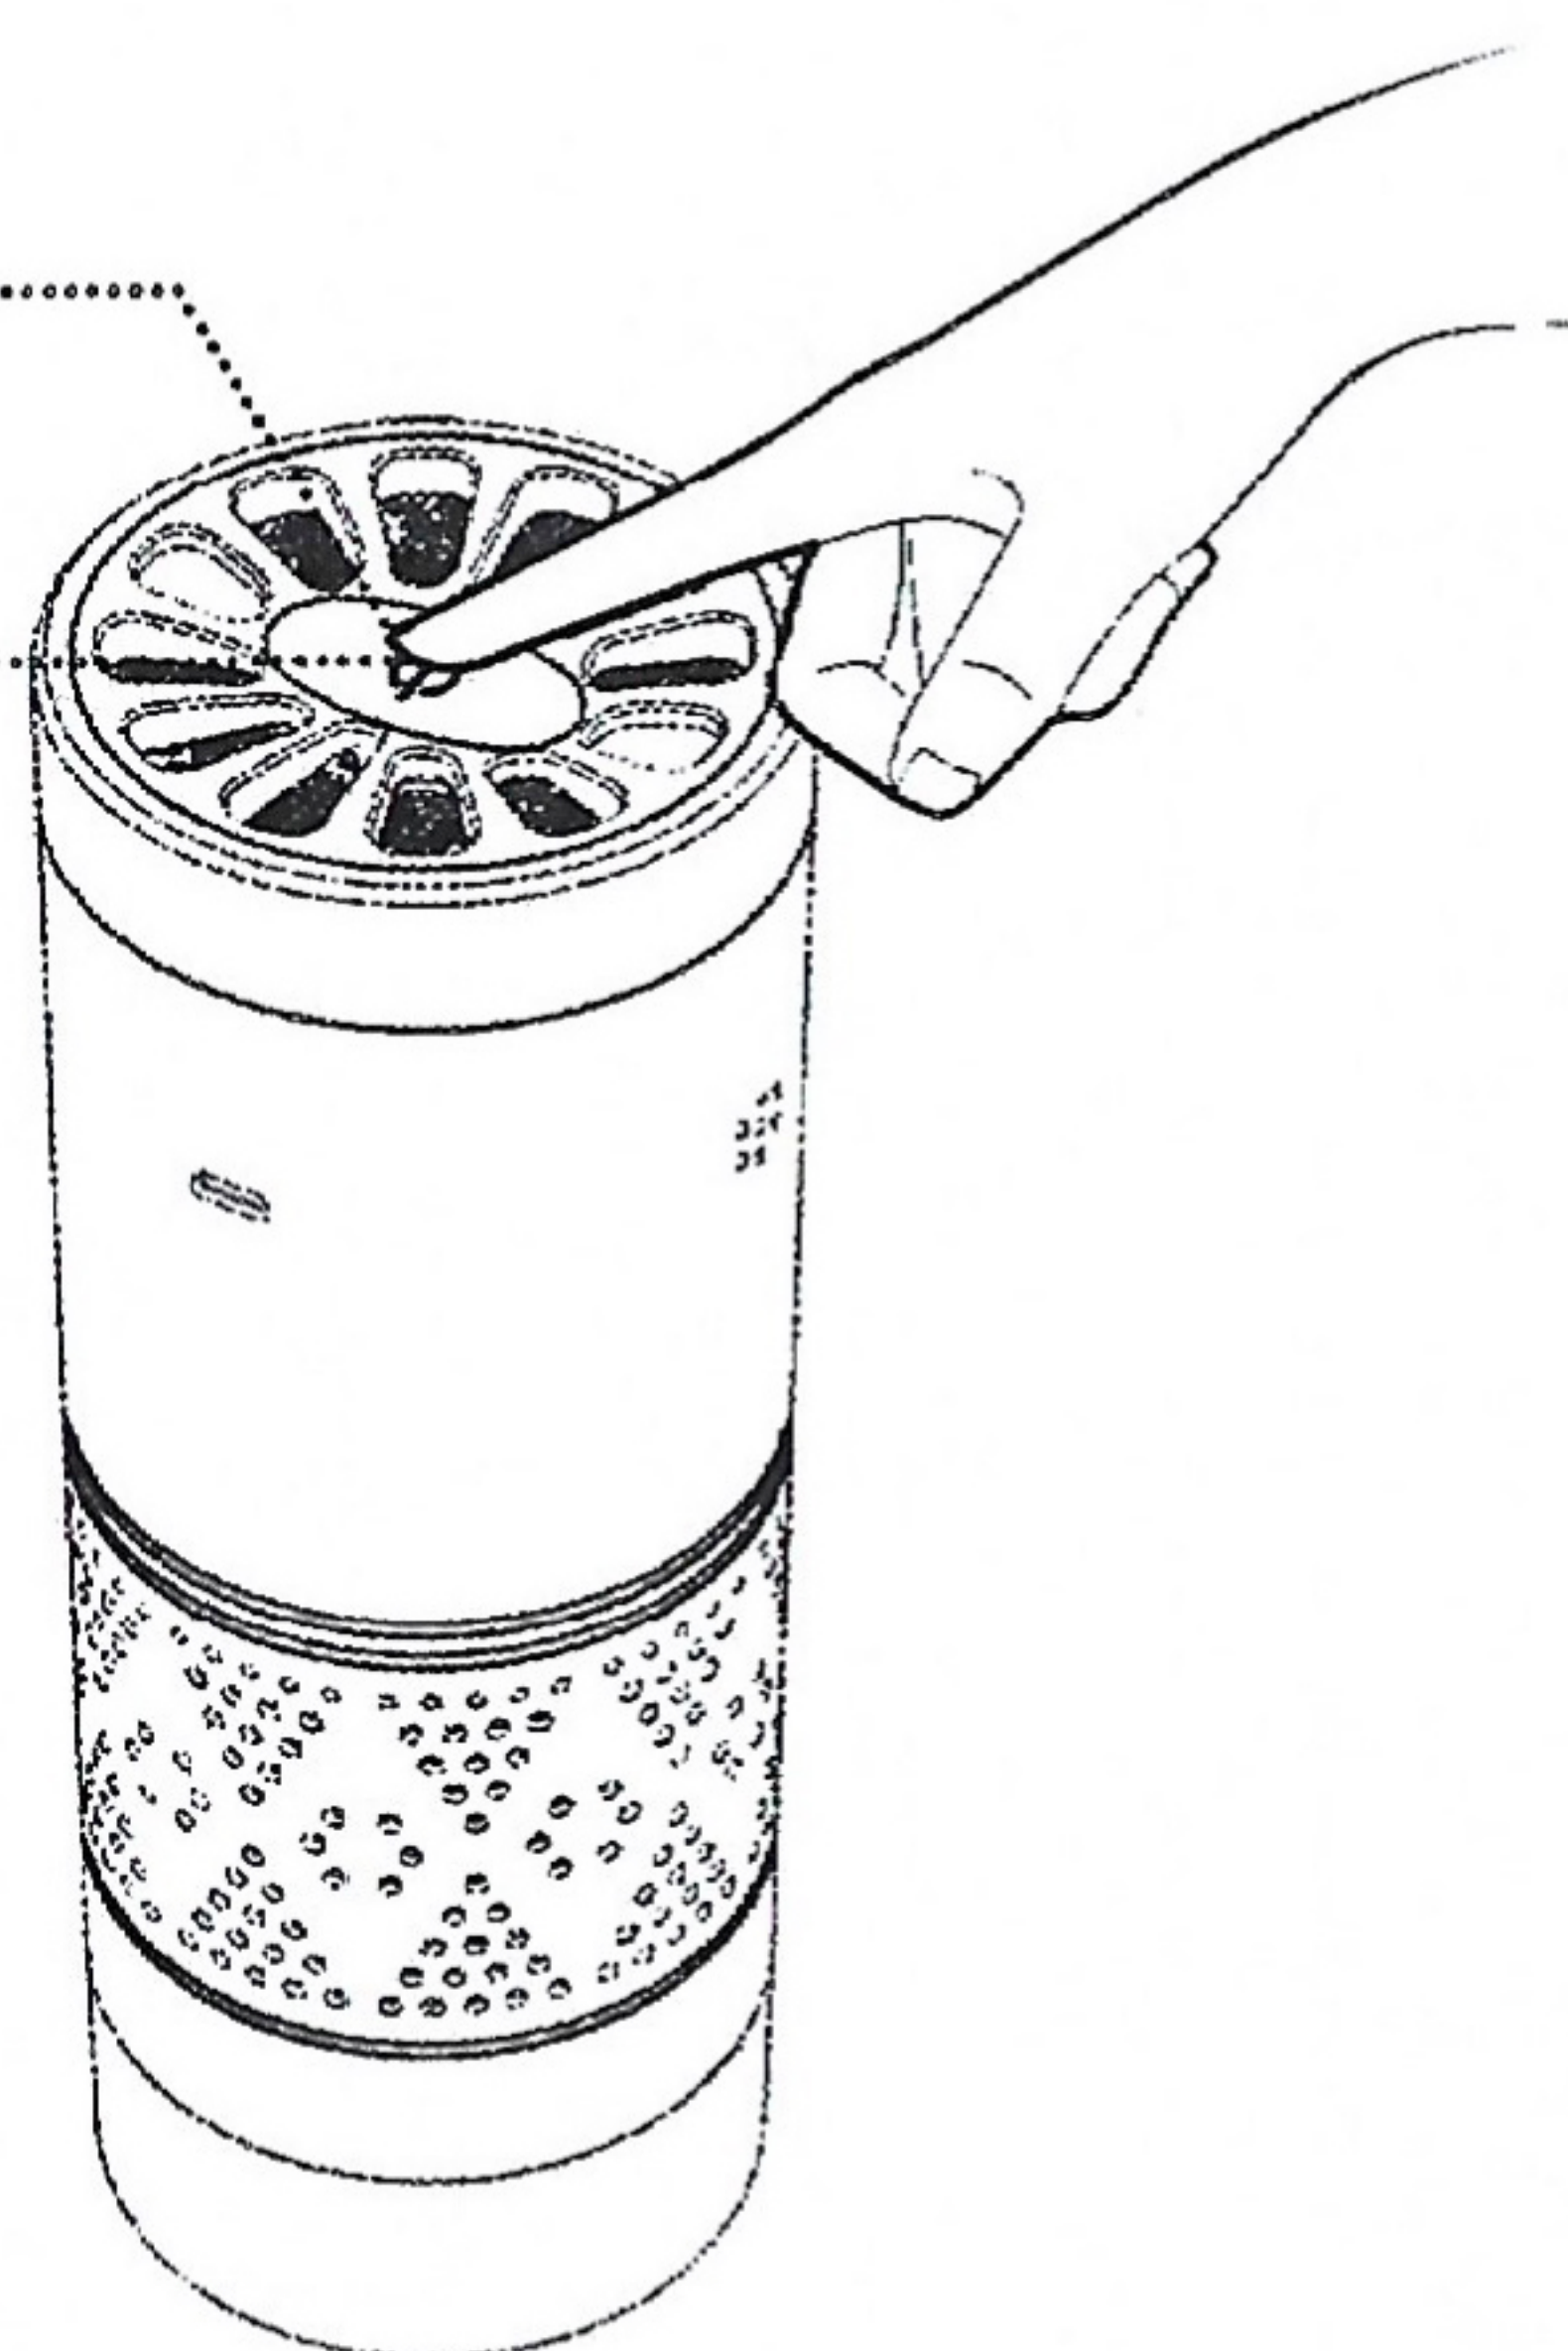

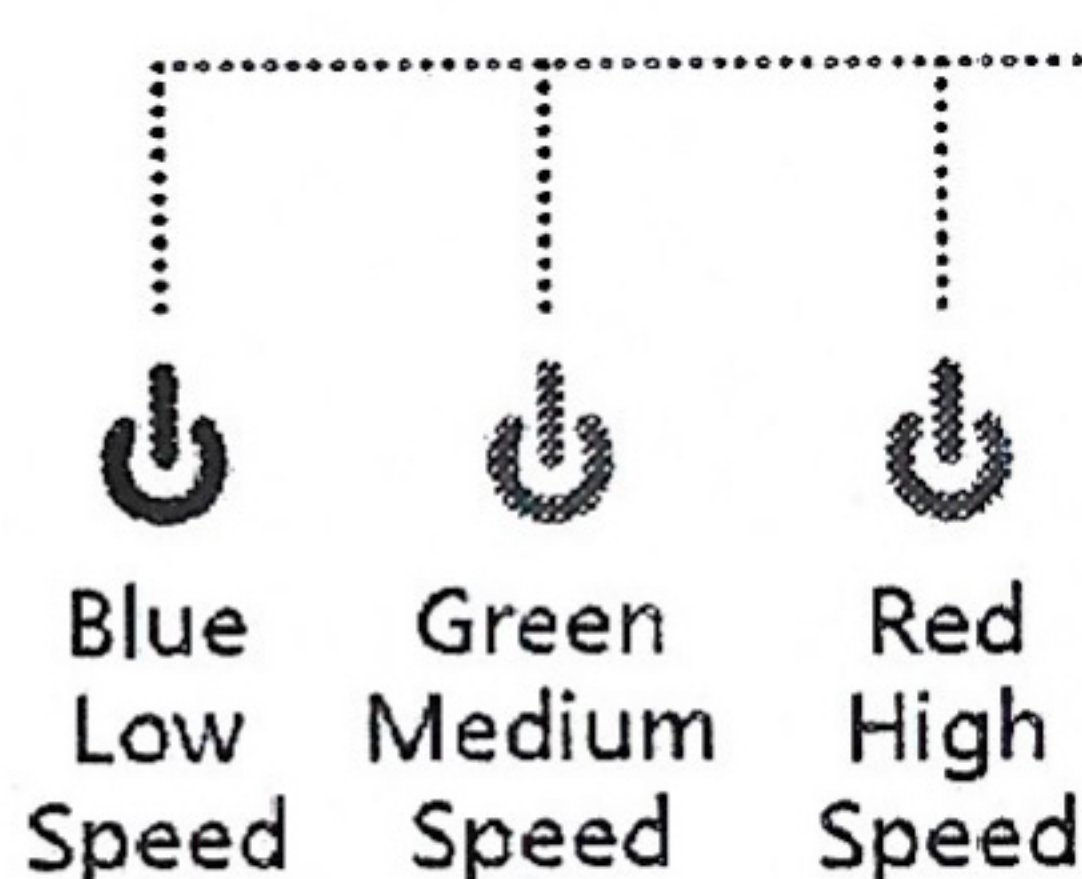

- **Manual mode (setting fan speed):**

Users can opt to manually set the fan speed to Medium(green), High(red)

When in auto mode, press the Power button to set the desired fan speed.

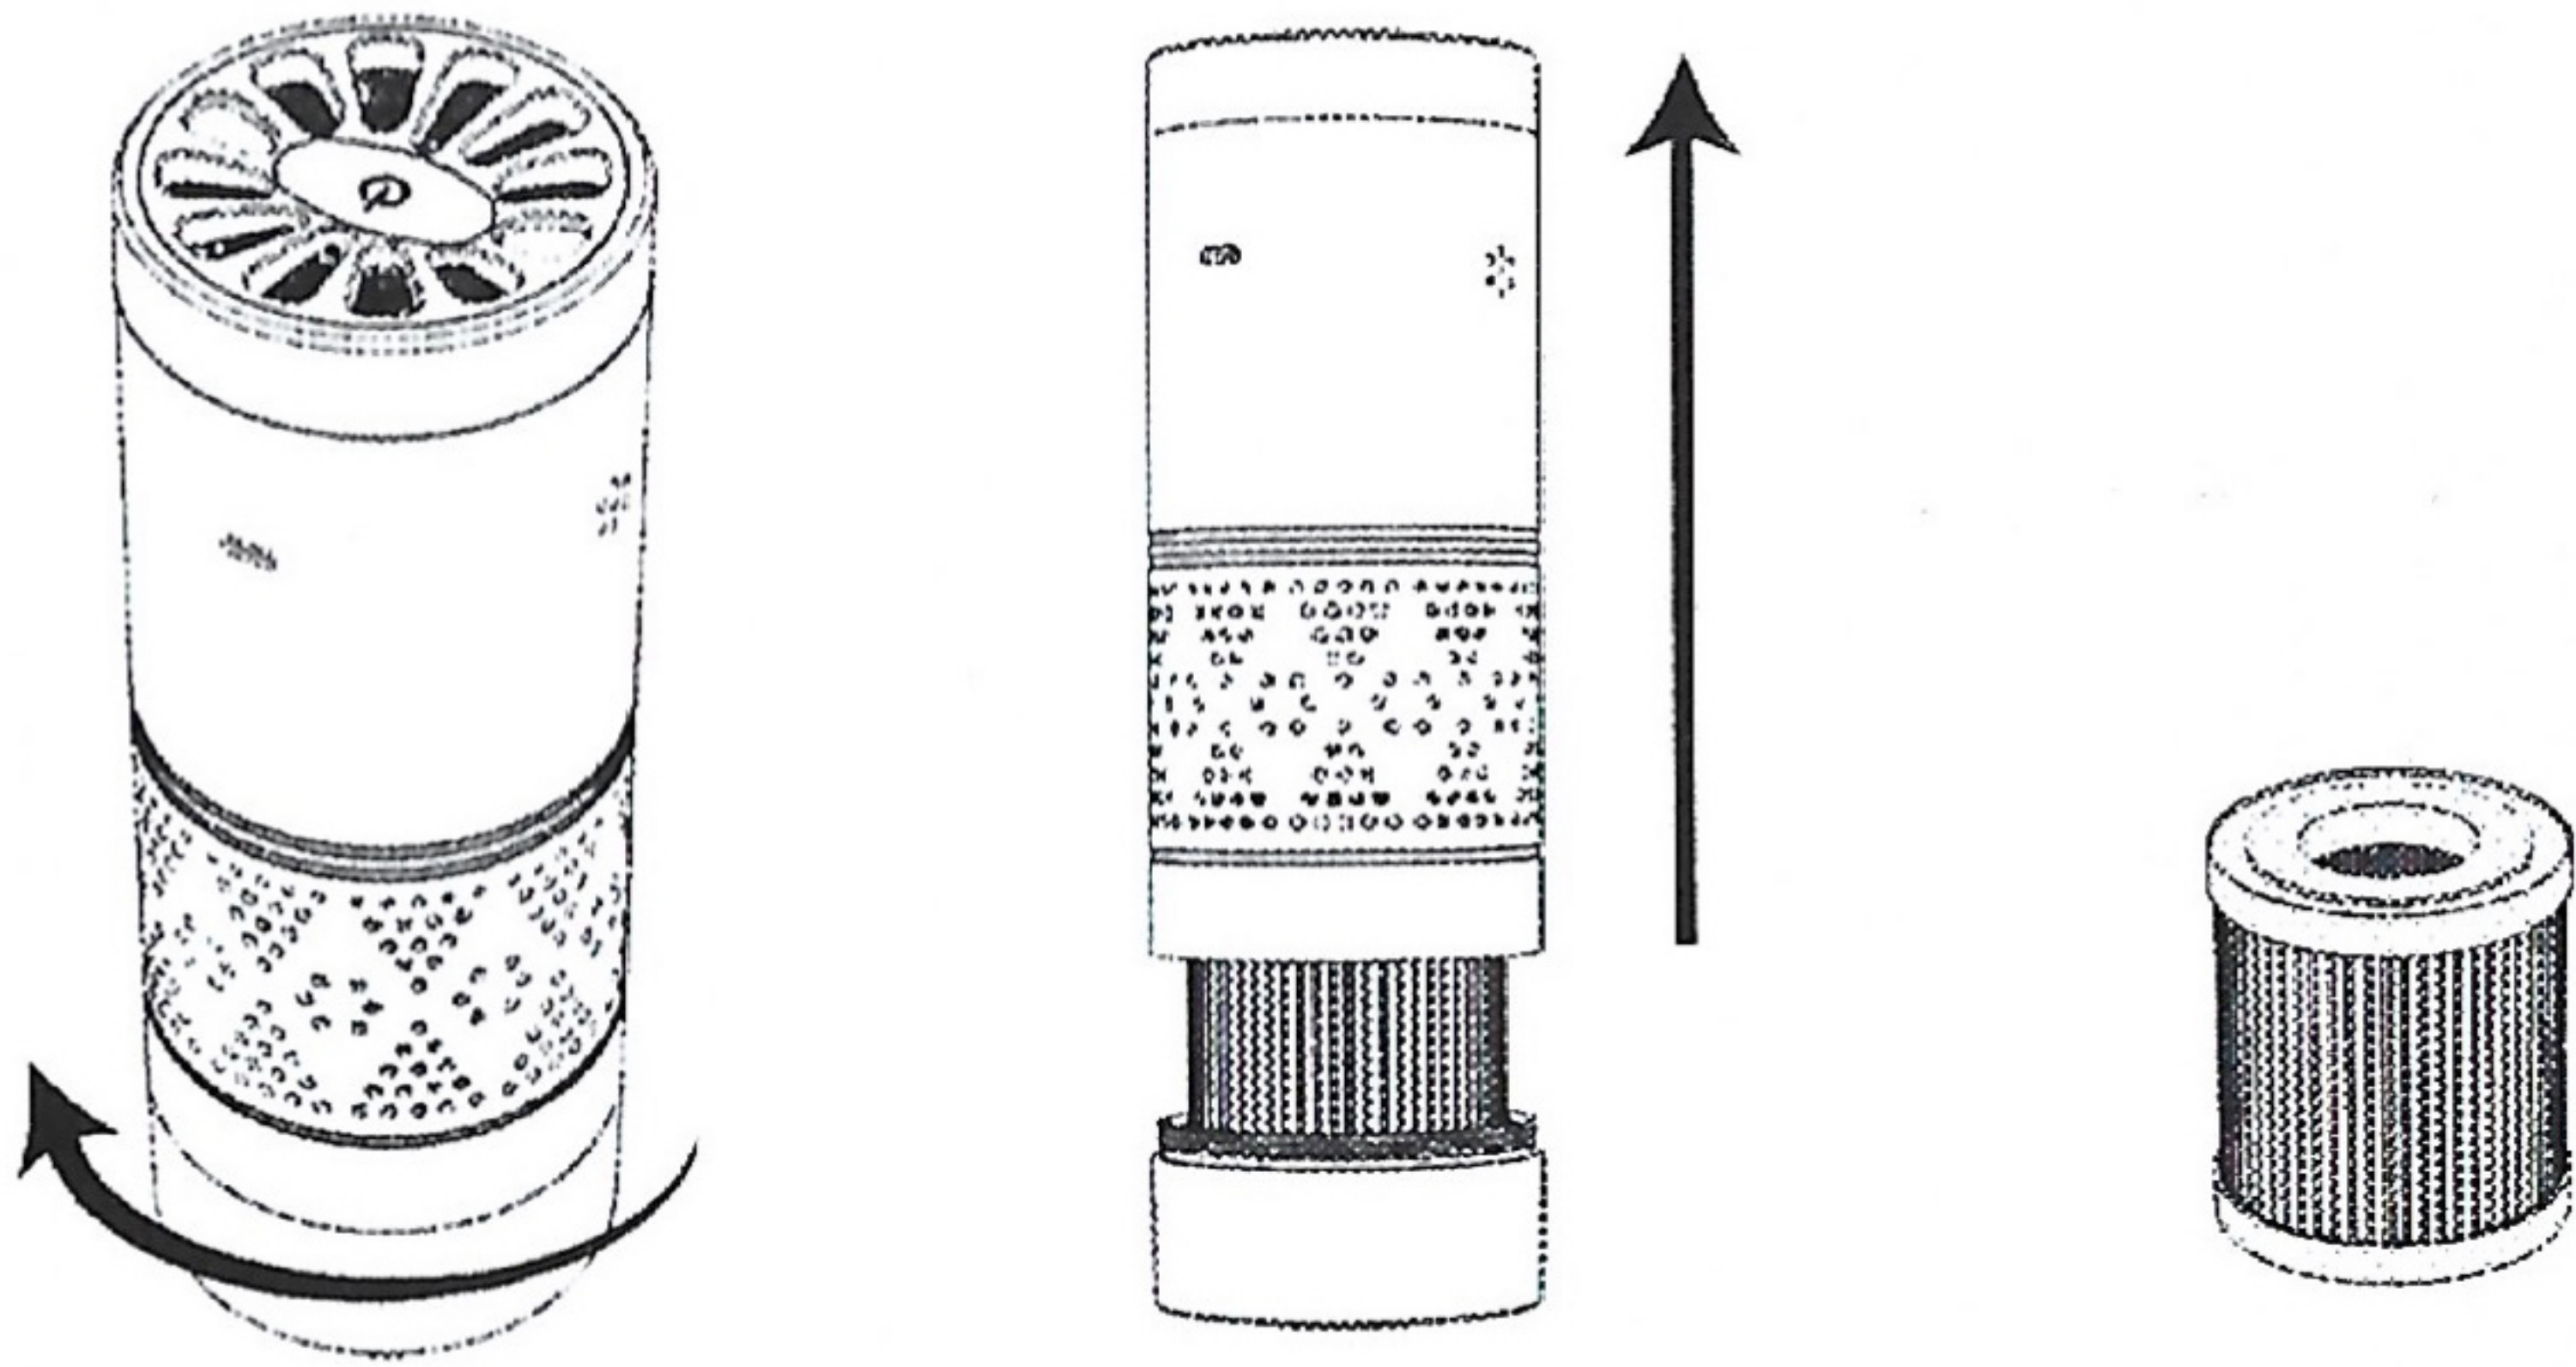

When in High speed mode(Red), press the power button again to return to the auto mode.

Power Button/
Fan Speed Button

- **Replacing Filter**

If the LED light blinks red, it means you need to change the HEPA filter.

1. Turn the bottom cover clockwise.
2. Remove the the bottom cover
3. Remove the used filter, being careful that any residue or debris that may fall from the filter
4. Insert the replacement filter into the unit, ensuring that it is correctly fitted and centred
5. Replace the cover back
6. Long press 5s reset the device.

- * The filter life is approximately 1000 hrs or replace the filer every 3-6 months
- * The filter life may vary to this timing,depending on environmental conditions
- * The filter is not washable. Do not immerse any part of the air purifier in water as it will cause damage.

- **Power on/off:**

1. Connect/disconnect the air purifier to the power source, it will turn on/off automatically;
2. Long press the power button 3 seconds to manually turn it on/off.

TROUBLESHOOTING & SOLUTION

Malfunction	Check point	Solution
Failure to power on	Check if switch is on.	Plug out the power cord and plug in it again
	Check if plug is loose	Correctly plug it to power source
	Check if the air purifier is correctly installed	Correctly install the unit
Unit operating sound very low and weak air output	Check if PE bag was removed	Remove the PE bag and install the filters in correct order
	Check if air outlet is blocked	Turn off the unit and remove any obstruction
Air outlet has an odor	Check if there are objects with odor placed near unit's air inlet	Remove those odor-causing objects or change the location of the purifier
	Check if the filters need to be replaced	Replace filter for the unit
